Skills

- **Languages**: Python, C, Html, CSS, Java, SQL
- **Frameworks**: Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn
- **Tools/Platforms**: Excel, Git, Tableau, Docker, Jupyter Notebook, Anaconda
- **Soft Skills**: Leadership, Collaborative, Team Management, Adaptability, Creativity

Projects

Chatbot with Sentiment Analysis | *Python, Pandas, Sklearn, Nltk* Dec'25

- Developed an intelligent chatbot capable of conducting natural conversations with integrated hybrid sentiment analysis for accurate emotion detection that boost the accuracy by 70%.
- Integrated LLaMA-3.1-8B model to generate context-aware, human-like responses, enhancing conversational quality.
- Incorporated a crisis detection module to identify sensitive inputs (e.g., distress) and deliver safe, responsible responses.
- Carried out ASCII-based sentiment visualization, enabling clear interpretation of emotional shifts across the conversation

Cars Dataset Analysis | *Python, Numpy, Pandas, Matplotlib, Seaborn* Jan'25

- Performed Exploratory Data Analysis (EDA) on a comprehensive car dataset to find some key insights and data patterns.
- Conducted statistical analysis to identify relationships between features such as price, sales, usp, fuel efficiency etc.
- Visualized data using Seaborn and Matplotlib via various graphs and plotting techniques such as heatmap, barplot etc to detect trends and anomalies helping to reduce outliers by 10%.
- Delivered processable information to support the commercial strategy and market segmentation in the automobile sector.

Student Management System | *Python, Tkinter, Sql* Oct'24

- Designed and developed a fully functional Student Management System with an integrated front-end, back-end, and database.
- Structured an intuitive Tkinter-based GUI enabling seamless student record management including all necessary functionalities.
- Applied object-oriented programming (OOP) principles for modular, scalable, and maintainable code structure.
- Simplified record management processes, improving the accuracy of data through error management and form validation which improved operational efficiency by 12%.

Training

Lovely Professional University | Think Design Prototype & Figma Jun'25 –Jul'25

- Mastered an intensive two-month UI/UX design training program, focusing end to end product design process.
- Designed wireframes, prototypes, and high-fidelity UI screens using Figma and Balsamiq to ensure high quality prototype build.
- Applied design thinking methods to develop creative, practical and easy to use solutions with prototyping and iterative testing.
- Regulated usability testing and feedback analysis to refine designs and improve user experience while using the prototype.
- Strengthened expertise in visual designing principles to deliver seamless experience.

Certificates

- Ethical Hacking (CEH) Ongoing
- Think Design Prototype ui/ux (LPU) Jul'25
- Computer Architecture and Design (Coursera) Dec'24
- Python for Data Science and Machine Learning (Ihub Dibyasampark) Sept 24
- Responsive Web Design (FreeCodeCamp) Oct'23

Achievements

- **Sports and co-curricular:** Apr'25
  Represented team CSE in a badminton tournament organized by Student Welfare Wing, LPU.
- **Event Management:** Sept'23
  Volunteered 2 events under Coding Ninja club organizing a fresher's party and an EDM night named Sunburn.

Education

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering *Since Aug'23-Present*
- **D.A.V Public School** Jharsuguda, Odisha
  Intermediate; ***Percentage: 80%*** *Apr'22 – Mar'23*
- **D.A.V Public School** Jharsuguda, Odisha
  Matriculation; ***Percentage: 88%*** *Apr'20 – Mar'21*
